BLACK CREEK FARM & FEED SPONSORS RAIN-WATER HARVESTING WORKSHOP

Black Creek, BC— We all know this is the “wet” coast, so why not take advantage of the abundance of rain and harvest it to use for your farm animals, your landscaping, or other water-related chores?

To help area residents and businesses learn more about rain-water harvesting and the materials that are needed, Black Creek Farm & Feed is sponsoring “An Introduction To Rain-Water Catchment” at the Black Creek Community Centre—Saturday, April 27, 11am-1pm.

The presenter, John Richardson, will discuss uses for rain-water, evaluating your home, system design considerations, selection of materials (piping, screens, tanks, pumps if required), and maintenance.

Mr. Richardson is president of Premier Plastics, Inc., a manufacturer of water tanks and septic tanks in Delta. He is also a founding member of the American Rainwater Catchment Systems Association (ARCSA).

The fee for the two-hour program is \$15 per person. Each participant will receive a \$5 coupon for Black Creek Farm & Feed upon completion.

Due to limited seating, advance registration is required by April 15; call 250-337-5190.

Black Creek Farm & Feed Supply, an award-winning IRLY/TimBr-Mart building supply center, is a privately owned, full-service farm-and-feed store that has been serving island communities for 30 years.
